

DOWNTOWN SOUTH BEND BIKE RACK PROGRAM

Guidelines

GOAL

To make downtown South Bend more bicycle friendly by offering free bike parking for businesses within the Central Business District.

PROGRAM DETAILS

Secure bicycle parking is essential for people to use bicycles for transportation. Leaving a bicycle unattended can result in theft. Without installing a quality bike rack and using proper guidelines, bike racks can pose as an obstacle to pedestrians and bicyclists alike.

DTSB in partnership with the City of South Bend has developed a downtown Bike Rack Program which will offer free bike racks to businesses within the Central Business District. The bike racks will be installed on a first come first serve basis (please note that the number of bicycle racks installed each year are limited based on available funding). DTSB will purchase and install the bike racks in the public rights-of-way in front of downtown businesses that meet the basic specifications for the program (see below).

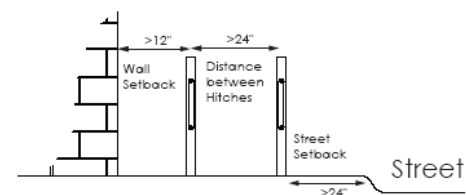

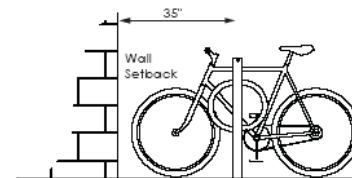

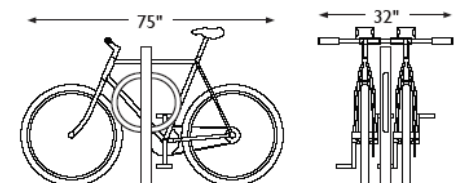

Bike Rack Design (Black): Dero Bike Hitch, manufactured by Dero Bike Racks

This free bike rack service is for the pre-selected style bicycle racks only. These racks are adequate for short term parking such as for use at businesses or libraries. Business owners taking advantage of this program must note that the bike racks installed in the public rights-of-way are meant for public use and are not for the sole use of each business. If a bike rack is damaged, DTSB will make its best effort to replace the unit as soon as possible dependent on available funding.

BIKE RACK SPECIFICATIONS

1. Each bicycle rack requires a parking space of 75" x 32".
There must be at least a four-foot clear walkway once the bicycle racks have been installed in the public rights-of-way.
2. The bicycle rack cannot be located directly in front of a store/building entrance or exit, nor in a driveway.
3. The rack cannot be located closer to the curb than two feet.
4. The bicycle rack should be located two to three feet from any street encroachments, ie. planters, utility poles, etc.

HOW TO APPLY

To apply for a bike rack in front of or near your business, you must first submit the DTSB Bicycle Rack Program application and be able to meet the specifications above. Once a DTSB staff person reviews your application, they will contact you to discuss the project. Approved business owners will be notified by mail. Expect 4-6 weeks for installation after notification.
